Hytec Business Solutions is the solution for all of your corporate design and collateral needs. Hytec's design team can give your company the image and presentation it needs to compete in today's dynamic market. Hytec will offer complete branding in all media types to ensure that your company has a consistent presentation to all aspects of the market.

Multimedia Delivers Your Ideas!

Multimedia gets your ideas across better and faster than any other kind of tool. With Mpeg movies, animation, voice, and Mp3 music, your message is delivered powerfully and easily. We author "zero footprint" software that copies no files to the user's computer.

Hytec develops with the absolute best multimedia authoring tools available. Compiled as a freestanding application for CD or web, portability is our target.

Capture your markets' attention. Discover the power of multimedia presentations today.

Hytec began its existence as a cutting edge print design firm. As the age of computer graphics was ushered in, Hytec Design was at the forefront utilizing state-of-the-art hardware and

software to give our clients the newest looks and effects.

With years of experience designing everything from four-color catalogs to yellow page ads, we can deliver the finished product to you or your database.

Amazing things can be done with print. Using metallic and fluorescent inks and gloss or matt varnishes, even UV coatings, along with fancy die cuts and edge treatments we create fresh designs that will get you the attention we all want.

Website Design is Second Nature.

Since 1996, Hytec has built websites for commerce and customer relations enhancement in all fields of practice.

Today we build web sites for a wide variety of clients, often as part of the functionality of a CD program. It is a critical presence for your company, and it needs to be designed to the same high standards that your other collateral must meet.

For those who want really intense web pages, we build them with Macromedia Flash and Shockwave.

Make sure that your product has the same high quality look as your sales collateral. If you do catalog sales or e-commerce, consistency of your presentation is important to ensure repeat business.

When you need to reposition your company, and you need a look that defines what your company does today and will do tomorrow, we have the experience to help you find that brand-new look.

However you define your goals, we can help you achieve them with a visual statement that is definitive and durable, and reflects the tone of the marketplace as well as your corporate culture.

Ask about Hytec's Brand Development Program. It offers a structured approach to discovering what is right for your company.
